High Power SP9T/10T DC-6 GHz Switch

RLC Electronics, Inc. has recently launched a new SP9T/SP10T higher power handling switch series. These switches operate from DC-6 GHz (min) and will handle upwards of 150W cW (previous designs limited power to 75W cW). Units exhibit low loss (0.25dB), high isolation (>70dB) and are designed to operate in severe environmental conditions. Switch to RLC for your Electro-Mechanical switch needs, from DC-65 GHz, SP2T-SP12T
