

Vino Waves and ATEK MIDAS Announce ATEK America LLC

Expanding North America GaAs and GaN MMIC Product Support for Demanding Customer Solutions

Boston, MA, June, 10 2026 – [ATEK MIDAS](#) a novel designer and supplier of high performance mixed-signal silicon ASICs & RFICs and advanced GaAs & GaN MMICs and Vino Waves are pleased to announce the formation of **ATEK America LLC**, a U.S. based company dedicated to delivering enhanced sales, marketing, product development, and operational support for ATEK MIDAS customers across the Americas.

Built with a strong focus on **customer service and responsiveness**, ATEK America strengthens ATEK MIDAS' ability to support engineers, partners, and suppliers with faster engagement, closer collaboration, and expanded local resources.

Vino Waves principals **Norm Hildreth** and **Vinny Cannistraro** now serve as Managing Partners of ATEK America, bringing deep industry expertise and a continued commitment to helping customers succeed. This transition has been carefully structured to be seamless, ensuring uninterrupted relationships and an even higher level of support for existing customers, manufacturer representatives, and suppliers.

Through its exclusive partnership with [ATEK MIDAS](#), ATEK America is uniquely positioned to provide hands-on support, technical guidance, and responsive service—helping customers move faster from concept to deployment.

ATEK America can be reached at sales@atekamerica.com or by phone at **781-789-8454** or **603-213-1250**. ATEK MIDAS's full portfolio of **MMIC, silicon ASIC, and module products** will continue to be available at atekmidas.com.

About ATEK America

ATEK America was founded by semiconductor industry veterans Norm Hildreth & Vincent Cannistraro in partnership with ATEK MIDAS, a catalog MMIC supplier & custom silicon ASIC / RFIC & GaAs/GaN/InP MMIC designer & manufacturer, to establish and manage their North American sales channel. We provide sales, marketing, and technical support to the ATEK MIDAS network of manufacturers' representatives and our customers. Our USA east coast location enables us to augment the ATEK MIDAS engineering team's technical support of customer ASIC projects as well support application questions on standard MMIC products. www.atekmidas.com

About ATEK MIDAS

ATEK MIDAS applies novel expertise, creativity, and passion to design high performance analog, mixed-signal silicon ASICs & RFICs and advanced GaAs & GaN MMICs & Modules for Aerospace, Automotive, 5G/6G Telecom, Data Center, Defense, Industrial / IoT, Medical, Scientific, and Test & Measurement markets. We partner with our customers to provide focused custom IC design and development services delivering IP blocks to engineering prototypes to turn-key production solutions complemented by our

line of MMIC standard products for communication and sensor applications to 100 GHz.
